Quick Start Guide

LS110
HelloDevice Lite Series

RoHS Compliant

SENA

Pin-out & Cabling

RS232 DB9 Pin-out	Pin	Signal
	1	-
	2	RxD
	3	TxD
	4	DTR
	5	GND
	6	DSR
	7	RTS
	8	CTS
	9	-

DB9 Male serial port pin-out for configuration and serial data communication

| LS110		Signal Devise
3 TxD	--------------	RxD 2
2 RxD	--------------	TxD 3
7 RTS	--------------	CTS 8
8 CTS	--------------	RTS 7
4 DTR	--------------	DSR 6
6 DSR	--------------	DTR 4
5 GND	--------------	GND 5

User can use serial data cable included in the product package for connecting host PC or serial device

Connection

① Connect Power
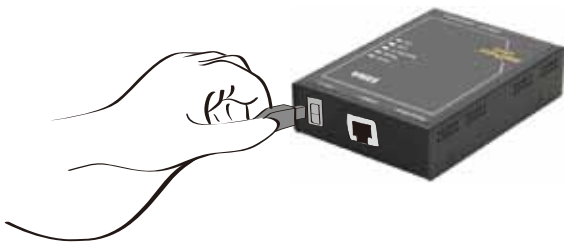

② Connect Ethernet Cable

③ Connect serial device

Serial Device

Configuration

User can choose one of the following processes

Default Log-in ID/Password is root/root.

1. Configuration using the Hyper terminal or Telnet

Connect to host PC. Then, slide Data/Console switch to the Console side.

Set up the serial configuration parameters of the terminal emulation program as follows:

9600 Baud rate / 8 Data bits / None Parity / 1 Stop bit / No Hardware flow control

2. Configuration using the HelloDevice manager

Insert CD

HelloDevice Manager and User Manual are available for download from Sena website at http://www.senaindustrial.co.kr/support/downloads/.

For more information, refer to the user manual.
